

Nigel Armfield

**Senior Research Assistant (Telepaediatrics) and PhD Candidate
Queensland Centre for Online Health, Royal Children's Hospital, Queensland,
Australia**

(<http://www.uq.edu.au/coh/index.html?page=58662&pid=0>)

Nigel is involved in developing, managing and evaluating the use of mobile telemedicine within the telepaediatric service. His research interest is focussed on paediatric telemedicine and in particular applications in neonatal and paediatric intensive care. He is also interested in mobile telemedicine and developing scalable approaches to telemedicine service management. As a PhD candidate, he is researching a novel real-time telemedicine application to support consultation between a tertiary neonatal intensive care unit and distant referring hospitals within Queensland. He is also a graduate student in the UQ School of Population Health studying public health. Nigel's previous roles have included communications engineering, management, teaching and research. He is also a former president and committee member of SANDS (Stillbirth and Neonatal Death Support) Queensland.
