

Taiwan's Experience of Telehealthcare in Rural Natural Disaster Areas

Mei-Ju Su

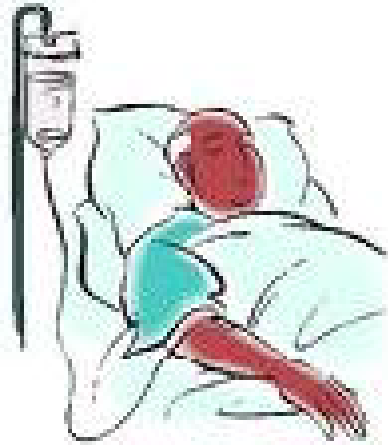

People of Natural disasters in Rural Areas need reconstruction, traffic transportation, living and etc. problems.

Supporting was limited due to the inconvenience of the traffic transportations in natural disasters area.

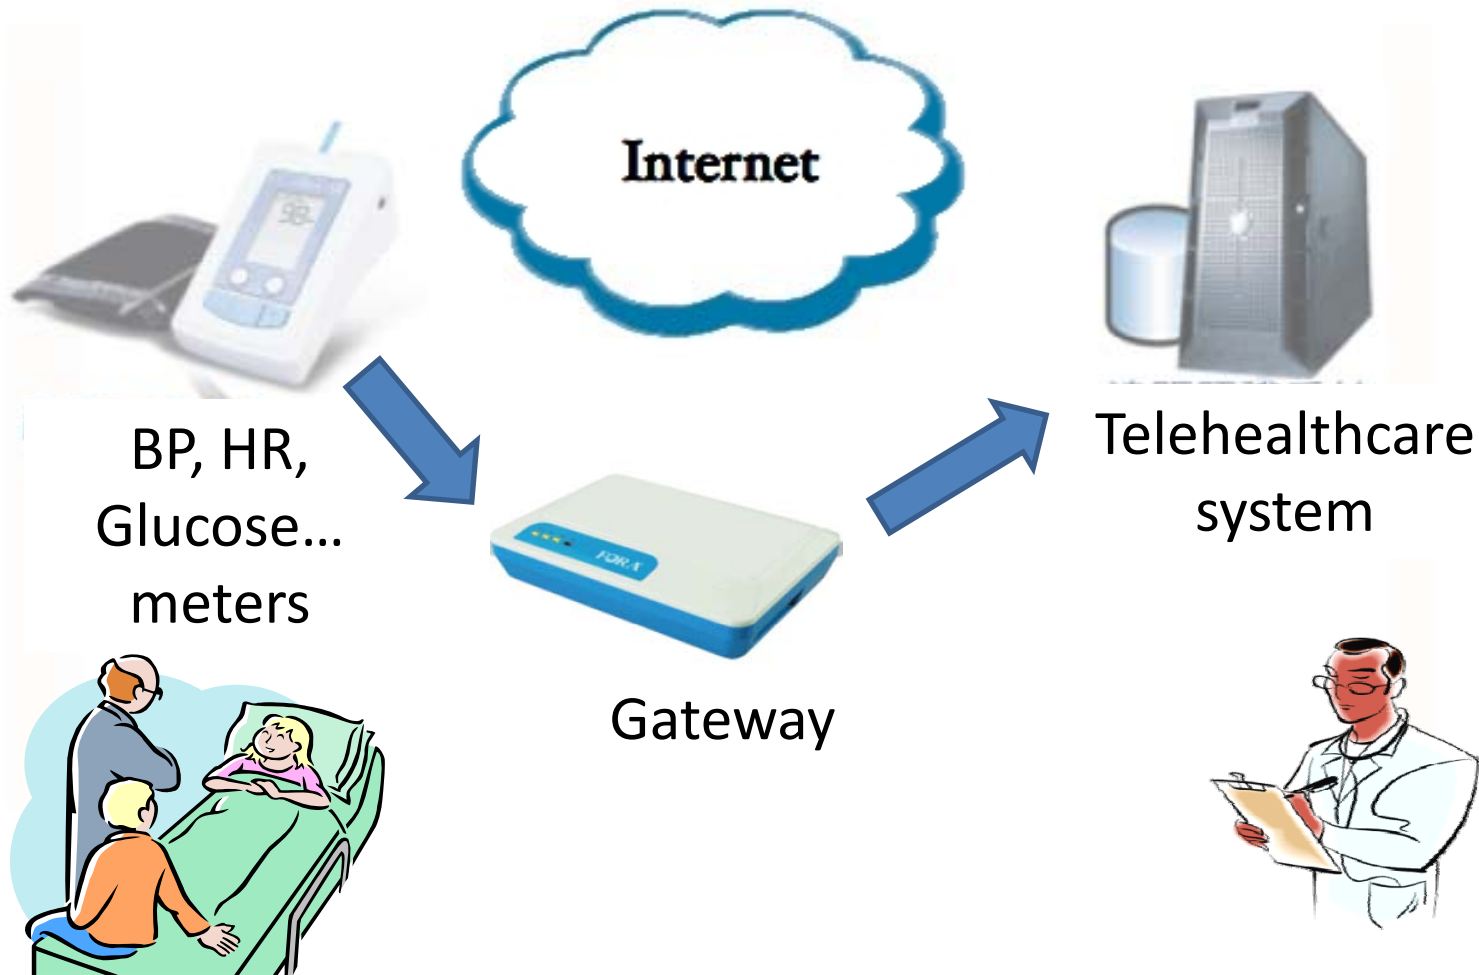

However, there were many important issues other than reconstructed the houses for people in disaster areas, for example, health care.

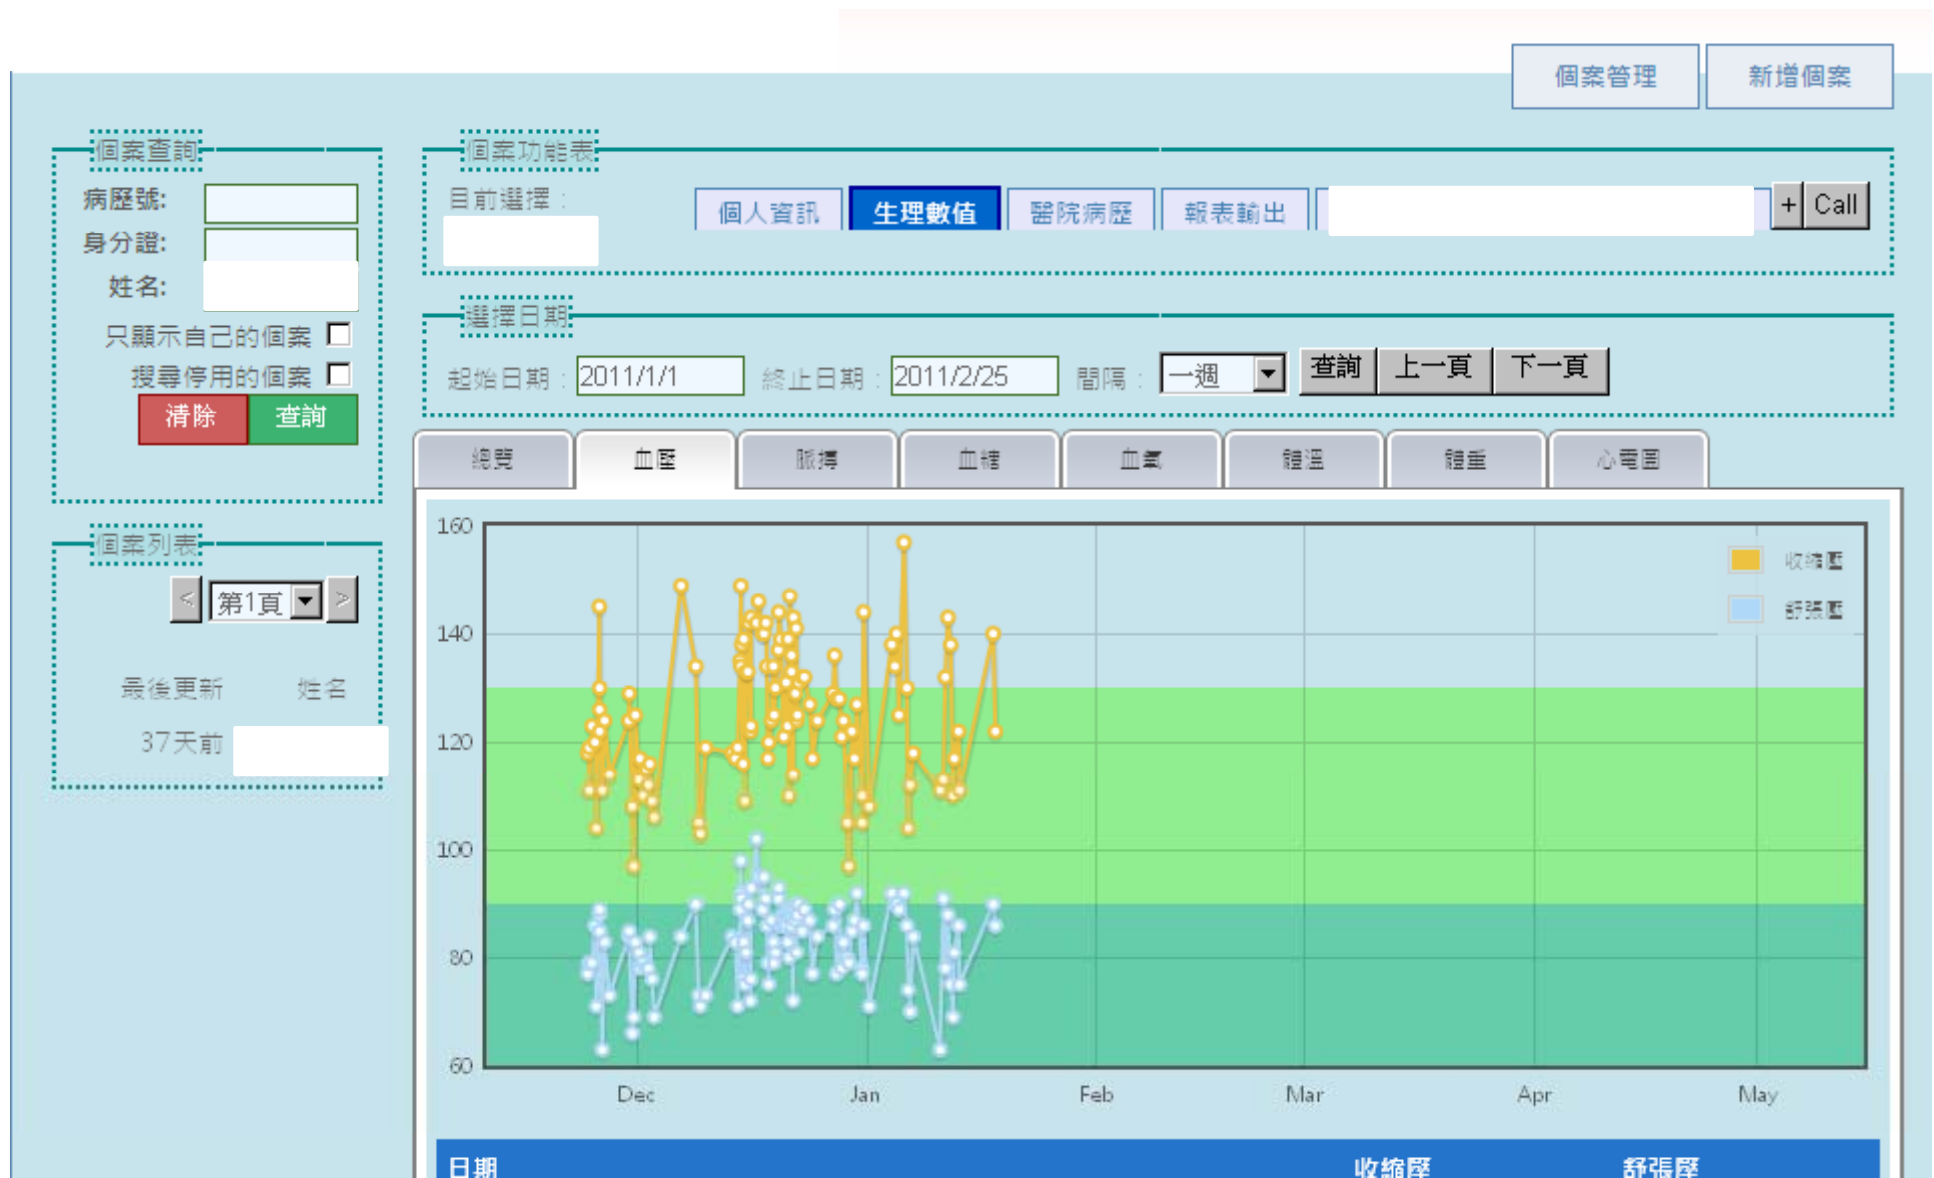

Non-governmental organizations (NGOs), Taiwan Christian Medical Association, were the major helpers.

Interface of Telehealthcare system
