

Keon W. Kang, M.D., Ph.D. is a nuclear medicine physician, and Associate Professor, Department of Nuclear Medicine, Seoul National University College of Medicine (2007-), S. Korea. He received M.D. degree from Seoul National University College of Medicine (1991). He was trained as an intern and a resident for Internal Medicine at Seoul National University Hospital (1991-1996). He received Ph.D. in Medical Science at Seoul National University (2001). He has worked as Chief, Department of Nuclear Medicine, Information Technology Team and Cancer Information Branch, National Cancer Center, Korea (2000-2007). He studied molecular imaging under the supervision of Prof. Sam Gambhir as a visiting scientist of Molecular Imaging Program at Stanford (2003-2004). His research areas are in vivo molecular imaging of cancer using PET & nanoparticles. He is studying clinical trials using angiogenesis PET for cancer, translational research using multifunctional nano-particles for optical/PET imaging, in vivo cell trafficking of stem cells or immune cells using bioluminescence, fluorescence, radio-labeled technology, and test biodistribution, pharmacokinetics, and efficacy of new drug using in vivo imaging.
