| 8 | 1 | 2 | 1 | 2 | 1 | 1 | As discussed during the session, we agree that video files should be sent prior to the event for smooth transmission. There was a slight lag when viewing presentation slides. Slides appear clear after <1 sec. Audio quality was very good most of the time. Participants should also remember to switch off their sharing prior to the next case. | Changi General Hospital                     | Medical Doctor |

| 12 | 2 | 2 | 2 | 1 | 1 | 1 | <ul style="list-style-type: none"> <li>•Doctors are usually not involved with the technical preparations and some of them may not know the reason behind certain requirement like to mute the mic when not talking, stop sharing when not projecting the power point slides (Vidyo), send video files to TEMDEC before the event (Vidyo), etc. It will be good to prepare a handout in pdf format concerning the specific requirement with explanation for each system like H.323, Vidyo, etc. We could attach it in our correspondence email esp to the new comers before the meeting?</li> <li>•There were moment when the transmitted voice became unclear and certain key message were not heard. Overall the sound quality was still good. Strong echo was heard during Prof. Neumann's presentation. Perhaps someone's mic was not muted.</li> <li>•The wording of the power point slides became unclear intermittently as if the software was trying to refresh the display intermittently as well. Hence, 50% of the time, the text were not readable. Dr. Andrew also mentioned this in his feedback.</li> <li>•Any possibility of incorporating a countdown timer into Vidyo? This will help us better manage the time. Vidyo software engineer may consider this perhaps.</li> </ul> | University of Malaya                              | Medical Doctor |
