## If you found any problems in teleconference, please let us hear your comments.

We still see some problems when several speakers try to say something simultaneously.

N.A.

It was no problem. Your team did very good job. Congratulation (Faculty of Dental Medicine Airlangga University)

None

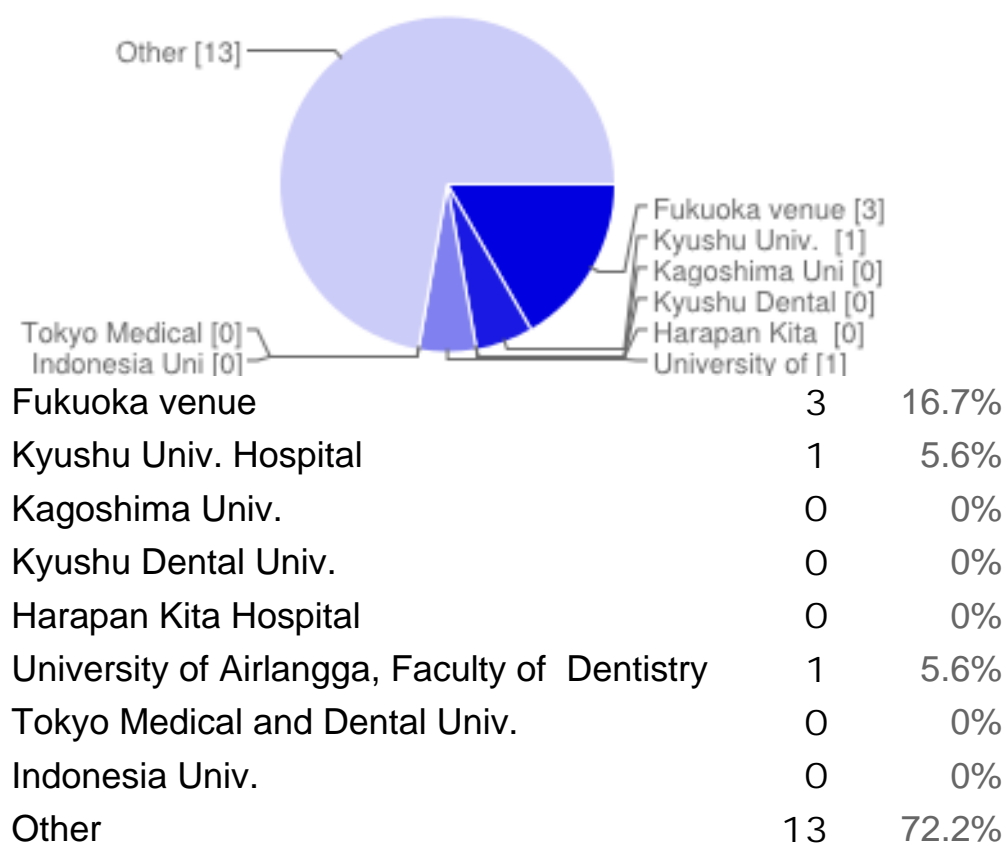

This's a excellent meeting. Wonderful.

Few instances of audio loss possibly due to poor band width. Many participants try to communicate at the same time. This needs to be resolved in some way so that communication is clearer. Maybe a buzzer app built within the software can help to resolve this issue.

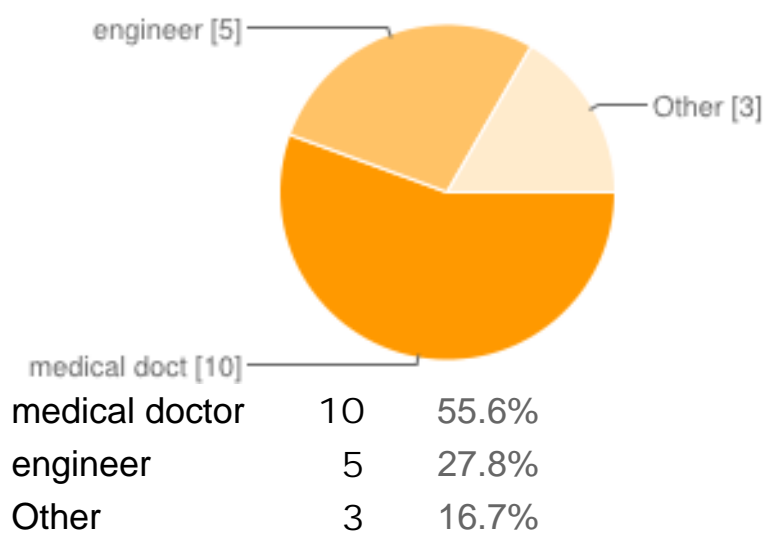

I could hear sometimes small noise, but no problem for the conference. Sometimes the sound quality changed bad, so we could not hear well.

Echo was generating from some of the station
