(9) If you found any problems in teleconference, please write any comments you may have.

We face an internal Power Failure before we start the session. Other than that there was no any problem this time.

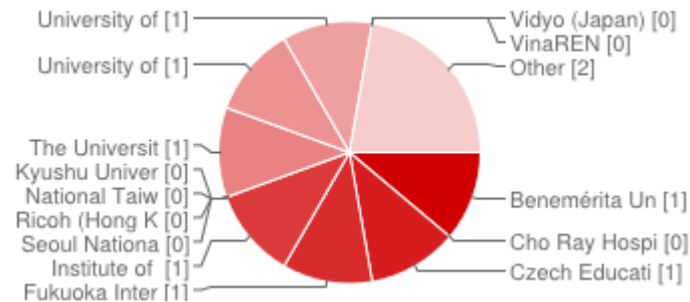

I had problem with my microphone. Using ASUS zenbook UX32 under MSWindows 8.1. With other simmlar applications microphone is working fine (Skype, Lifesize client). I had similar problem last year but when I dowloaded other Vidyo version problem was resolved. In this case I use VIDYO version downloaded directtly from HKG server.

A self test procedure something like Skype will help setup.

Have sound echo from some site.

DVTS still has better video quality, but needs a lot more experience, equipment and time to set it up right.
